	Examiner Tony H. Winner	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Acknowledgment

1. Receipt of the IDS filed 18/15/06 has been acknowledged and entered. In light of the IDS, the office is expunging the previous Notice of Allowance, dated 6/21/06. The office also withdraws the miscellaneous letter sent to applicant on 9/7/06. The delay in citation of the rejection is regretted. An action on the merit is follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art (Figure 1) and in view of Grosspietsch et al. (USPN. 2002/0040614 A1).

The PA discloses all of the structural of the power steering as claimed. The PA lacks the teaching of a curvature of said female thread groove is smaller than that of said male thread groove.

Grosspietsch discloses a ball screw mechanism wherein the curvature of said female thread groove is smaller than that of said male thread groove (paragraph 0025) so that the ball (28) has to move further on the male groove, thus, essentially provide a slip-free rolling movement.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the power steering apparatus of PA as taught by Grosspietsch to include the larger male thread groove. Such a modification would essentially provide a slip-free rolling movement.

With regard to claim 2, PA as modified by Grosspietsch discloses the claimed invention except for the teaching of a specific range of the curvature. It would have been obvious to one having ordinary skill in the art at the time the invention was made to optimize the range of the male/female curvature so as to provide better performance and handling, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
